

The world's thinnest notebook

MacBook Air is ultrathin, ultraportable, and ultra unlike anything else. But you don't lose inches and pounds overnight. It's the result of rethinking conventions. Of multiple wireless innovations. And of breakthrough design. With MacBook Air, mobile computing suddenly has a new standard.

The new, more-to-love MacBook

Faster is just the beginning. The new MacBook features the latest Intel Core 2 Duo processors, larger hard drives and up to 2GB of memory standard. Best of all, it's the same does-everything-you-want notebook but better.

The new, more powerful MacBook Pro.

The latest Intel processor, a bigger hard drive, plenty of memory, and even more new features all fit inside a liberating 2.59 cm. The new MacBook Pro has the performance, power, and connectivity of a desktop computer. Without the desk part.
